SKILLS

- **Languages:** C++, JavaScript
- **Frameworks:** HTML and CSS
- **Tools/Platforms:** MySQL, MongoDB

PROJECTS

Simple Fitness Club Website

January 2025- March2025

- Built a full-featured Fitness Club website using the MERN stack, enabling users to explore workout plans, manage memberships, and track progress in a user-friendly interface.
- Designed a scalable backend architecture with MongoDB and Express, ensuring seamless performance and the ability to handle thousands of user profiles, real-time updates, and content management with low response latency.
- Gained hands-on experience with full-stack development, including REST API creation, JWT-based user authentication, and React-based dynamic front-end components—resulting in a responsive, mobile-friendly platform and an enhanced user experience.

Tic Tac Toe Game – Web-Based Application

May 2024-July2024

- Developed an interactive Tic Tac Toe game to enhance logical thinking and frontend development skills, allowing users to play against each other with real-time feedback and smooth user interactions.
- Designed an intuitive UI and implemented core game logic using HTML, CSS, and JavaScript (or React, if applicable), focusing on responsive design, player turn handling, and win/draw detection.
- Gained hands-on experience in frontend state management, event handling, and dynamic rendering, leading to a clean, bug-free user experience and helping solidify foundational programming concepts in a fun and engaging project.

Food Delivery App – UI/UX Design with Figma

March 2023- May2023

- Designed a user-centric food delivery app using Figma, focusing on clean visual layout, intuitive navigation, and a seamless ordering experience to enhance user satisfaction and engagement.
- Created detailed wireframes, high-fidelity mockups, and interactive prototypes, covering core features such as restaurant browsing, cart management, order tracking, and secure checkout flow.
- Gained hands-on experience in UI/UX design principles, user journey mapping, and responsive layout creation, resulting in a polished, mobile-first design that streamlines the food ordering process and boosts user retention.

CERTIFICATES

- | | |
|---|----------------------|
| • C++ and Data Structures Algorithms from Cipher School | May 2024 – June 2024 |
| • Introduction to Hardware and Operating Systems by IBM. | Aug 2024 – Sep 2024 |
| • The Bits and Bytes of Computer Networking by Coursera. | Nov 2023 – Dec 2023 |
| • C++ Basic Structures: Vectors, Pointers, Strings and Files by Coursera. | June 2023– July 2023 |

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering

Punjab, India

Since August-2022

Saint mary's inter college.

Matriculation; Percentage: 85 %
